MITSUBISHI ELECTRIC INDUSTRIAL AUTOMATION

●SAFETY PRECAUTIONS●

(Always read these precautions before using this equipment.)

Before using this product, please read this manual and the relevant manuals introduced in this manual carefully and pay full attention to safety to handle the product correctly.

The precautions given in this manual are concerned with this product.
In this manual, the safety precautions are ranked as "DANGER" and "CAUTION".

⚠ **DANGER**	Indicates that incorrect handling may cause hazardous conditions, resulting in death or severe injury.
⚠ **CAUTION**	Indicates that incorrect handling may cause hazardous conditions, resulting in medium or slight personal injury or physical damage.

Note that the ⚠ caution level may lead to a serious accident according to the circumstances. Always follow the instructions of both levels because they are important to personal safety.

Please save this manual to make it accessible when required and always forward it to the end user.

[DESIGN PRECAUTIONS]

⚠ CAUTION

● Do not bundle the control and communication cables with main-circuit, power or other wiring.
   Run the above cables separately from such wiring and keep them a minimum of 100mm (3.94in.) apart. Not doing so noise can cause a malfunction.

[MOUNTING PRECAUTIONS]

◇ DANGER

● Be sure to shut off all phases of the external power supply used by the system before mounting or removing this unit onto/from the GOT.
   Not doing so can cause the unit to fail or malfunction.

⚠ CAUTION

● Use this unit in the environment that satisfies the general specifications described in User's Manual.
   Not doing so can cause an electric shock, fire, malfunction or product damage or deterioration.

● Tighten the mounting screws within the specified torque range.
   Undertightening can cause the GOT to drop, short circuit or malfunction.
   Overtightening can cause a drop, short circuit or malfunction due to the damage of the screws or the GOT.

● Do not touch the conductive and electronic parts of the unit directly.
   Doing so can cause a unit malfunction or failure.

[WIRING PRECAUTIONS]

⟨!⟩ **DANGER**

● Be sure to shut off all phases of the external power supply used by the system before wiring.
Failure to do so may result in an electric shock, product damage or malfunctions.

⚠ **CAUTION**

● Exercise care to avoid foreign matter such as chips and wire offcuts entering the GOT. Not doing so can cause a fire, failure or malfunction.

● Make sure to securely connect the cable to the connector of unit.
Incorrect connection may cause malfunctions.

● Do not hold the cable by hand and pull it out from the unit.
When removing the cable from the unit, make sure to hold the connector by hand and pull it.
Failure to do so may cause malfunctions or damage to the unit or cable.

● Solder the coaxial cable connector correctly.
Incomplete soldering may cause a malfunction.

[STARTUP/MAINTENANCE PRECAUTIONS]

◇ DANGER

- When power is on, do not touch the terminals.
  Doing so can cause an electric shock or malfunction.

- Before starting cleaning, always shut off GOT power externally in all phases.
  Not doing so can cause a unit failure or malfunction.
  Undertightening can cause a short circuit or malfunction.
  Overtightening can cause a short circuit or malfunction due to the damage of
  the screws or unit.

⚠ CAUTION

- Do not disassemble or modify the unit.
  Doing so can cause a failure, malfunction, injury or fire.

- Do not drop the module or subject it to strong shock.
  A module damage may result.

- Before touching the unit, always touch grounded metal, etc. to discharge static
  electricity from human body, etc.
  Not doing so can cause the unit to fail or malfunction.

[DISPOSAL PRECAUTIONS]

⚠ CAUTION

- When disposing of the product, handle it as industrial waste.

[TRANSPORTATION PRECAUTIONS]

⚠ CAUTION

- Make sure to transport the GOT main unit and/or relevant unit(s) in the
  manner they will not be exposed to the impact exceeding the impact
  resistance described in the general specifications of GT15 User's manual, as
  they are precision devices.
  Failure to do so may cause the unit to fail.
  Check if the unit operates correctly after transportation.

REVISIONS

Print Date	*Manual Number	Revision
Mar., 2006	IB(NA)-0800348-A	First edition
Feb., 2007	IB(NA)-0800348-B	Partial addition Chapter1, Section 2.4.1 Addition Compliance with the EMC and Low Voltage Directives
Jul., 2007	IB(NA)-0800348-C	Partial corrections Compliance with the EMC and Low Voltage Directives, Chapter 2, 3, 4

CONTENTS

Manuals

The following shows manuals relevant to this product.

Detailed Manual

Manual name		Manual number (Model code)
GT15 User's Manual	(Sold separately)	SH-080528ENG (1D7M23)
GOT1000 Connection Manual	(Sold separately)	SH-080532ENG (1D7M26)

Relevant Manuals

For relevant manuals, refer to the PDF manual stored within the drawing software used.

Packing List

The following items are included.

Model	Product	Quantity
GT15V-75V4	Video input unit	1
	Mounting screw set (2 screws,2 stickers)	2
	Extend interface relay board	1
GT15V-75R1	RGB input unit	1
	Mounting screw set (2 screws,2 stickers)	2
	Extend interface relay board	1
GT15V-75V4R1	Video/RGB input unit	1
	Mounting screw set (2 screws,2 stickers)	2
	Extend interface relay board	1

Compliance with the EMC and Low Voltage Directives

When incorporating the Mitsubishi GOT into other machinery or equipment and keeping compliance with the EMC and low voltage directives, refer to "EMC AND LOW VOLTAGE DIRECTIVE" of GT15 User's Manual.

The CE logo is printed on the rating plate of the GOT, indicating compliance with the EMC and low voltage directives.

1. Overview

This User's Manual is related to the following units.

- MODEL GT15V-75V4 Video Input Unit (referred to as the Video Input Unit hereinafter)
- MODEL GT15V-75R1 RGB Input Unit (referred to as the RGB Input Unit hereinafter)
- MODEL GT15V-75V4R1 Video/RGB Input Unit (referred to as the Video/RGB Input Module hereinafter).

When mounting the above units with the GT1585V-STBA, GT1575V-STBA (referred to as GOT hereinafter), the images taken by video cameras or screens on personal computers can be displayed on the GOT.

The video input unit can display the images taken by up to 4 video cameras on the GOT.

GOT can be used as a vision sensor monitor.

Image data

GOT
+
GT15V-75V4

Video camera[*1]

Video camera

Camera power pack[*2]

Vision sensor (AS50VS or other)
- *1: Power on the video camera simultaneously with the GOT.
- *2: Power supply for the camera may be necessary depending on the vision sensor to be used.

1

The RGB input unit can display a personal computer display on the GOT.
Video input is also available using an RGB output type vision sensor.

When connecting to a personal computer

GOT+GT15V-75R1

*1: When connecting with a personal computer, ground wire of the computer should be grounded.

When connecting to a video camera using an RGB output type vision sensor.

GOT+GT15V-75R1

RGB output type vision sensor
For the video/RGB input unit, functions of both video input unit (GT15V-75V4) and RGB input unit (GT15V-75R1) are available.

GOT*3

Video camera*2

A 1254
B 348

*1

Computer

PLCs for line control

*1: When connecting the unit to a personal computer, ground wire of the computer should be grounded.

*2: Power on the video camera simultaneously with the GOT.

*3: Video images and personal computer screens cannot be displayed on the GOT at the same time.

To use the Video input unit, RGB input unit and Video/RGB input unit, make the Communication Settings.
For setting details, refer to GOT1000 Series Connection Manual.

> For details of system configuration, refer to GOT1000 Series Connection Manual.
> For video input and RGB input functions, refer to the GT Designer2 Version□ Screen Design Manual.

2. Specifications

2.1 Video input unit specifications

Item			Specifications
Video input section	Video input system	Color	NTSC format, PAL format (interlaced format)
		Monochrome	EIA format, CCIR format (interlaced format)
	Number of video input channels		4 channel
	Input signal		IVp-p, 75Ω, composite signal
	Display size [dot's]		640x480 (possible to reduce to 320x240, 160x120) 720x480 (possible to reduce to 360x240, 180x120) [*1]
	Video external connection method		Coaxial cable
	Applicable wire size		75Ω coaxial shield cable
Maximum cable length			Refer to the specifications of the personal computer, vision sensor and video camera to be used [*2]
Internal current consumption (3.3VDC)			0.7A
Weight			0.2kg (0.44lb)

*1: Compatible with PAL and CCIR formats only.

*2: The length of a cable differs depending on the specifications of the vision sensor and video camera to be used.
    Be sure to use the cable with specified length for the vision sensor and video camera to be used.

2.2 RGB input unit specifications

Item		Specifications
RGB input section	RGB input method (dot's)	Analog RGB(SVGA; 800x600, VGA; 640x480)
	Number of video input channels	1 channel
	Input image signal	1Vp-p, 75Ω
	Synchronizing signal	TTL, 1kΩ
	Display size [dot's]	800×600 (refresh rate 60, 72, 75 [Hz]) 640×480 (refresh rate 60, 72, 75, 85 [Hz])
	RGB external connection method	D-Sub15 pin
	Applicable wire size	9-core combined cable (recommended)
Maximum cable length		Refer to the specifications of the personal computer, vision sensor and video camera to be used [1]
Internal current consumption (3.3VDC)		0.91A
Weight		0.17kg (0.34lb)

*1: The length of a cable differs depending on the specifications of the personal computer and vision sensor to be used.
Be sure to use the cable with specified length for the personal computer and vision sensor to be used.

2.3 Video/RGB input unit specifications

Item			Specifications
Video input section [3]	Video input system	Color	NTSC format, PAL format (interlaced format)
		Monochrome	EIA format, CCIR format (interlaced format)
	Number of video input channels		4 channel
	Input signal		IVp-p, 75Ω, composite signal
	Display size [dot's]		640x480 (possible to reduce to 320x240, 160x120) 720x480 (possible to reduce to 360x240, 180x120) [1]
	Video external connection method		Coaxial cable
	Applicable wire size		75Ω coaxial shield cable
RGB input section [3]	RGB input method (dot's)		Analog RGB(SVGA; 800x600, VGA; 640x480)
	Number of video input channels		1 channel
	Input image signal		1Vp-p, 75Ω
	Synchronizing signal		TTL, 1kΩ
	Display size [dot's]		800×600 (refresh rate 60, 72, 75 [Hz]) 640×480 (refresh rate 60, 72, 75, 85 [Hz])
	RGB external connection method		D-Sub15 pin
	Applicable wire size		9-core combined cable (recommended)
Maximum cable length			Refer to the specifications of the personal computer, vision sensor and video camera to be used [2]
Internal current consumption (3.3VDC)			0.95A
Weight			0.21kg (0.42lb)

*1: Compatible with PAL and CCIR formats only.
*2: The length of a cable differs depending on the specifications of the personal computer, vision sensor and video camera to be used. Be sure to use the cable with specified length for the personal computer, vision sensor and video camera to be used.
*3: Both video images and RGB screens cannot be displayed on the GOT at the same time.

2.4 Cable specifications

The following shows the cable specifications, connection diagram, and connector used for the video input unit, RGB input unit, and video/RGB input unit.

2.4.1 Specifications of the cables (coaxial cables) used when displaying video images

(1) Coaxial cable
Use high frequency coaxial cable "3C-2V" or "5C-2V" (conforms to JIS C 3501).
The following shows the coaxial cable specifications.

| Item	3C-2V	5C-2V
Construction	Internal condcuctive material, Insulating material, External conductive material, Sheath	
Cable diameter	5.4mm (0.21in)	7.4mm (0.29in)
Allowable bending radius	22mm (0.87in) or more	30mm (41.18in) or more
Internal conductive material diameter	0.5mm (0.02in) (Annealed copper wire)	0.8mm (0.03in) (Annealed copper wire)
Insulation material diameter	3.1mm (0.12in) (Polyethylene)	4.9mm (0.19in) (Polyethylene)
External conductive material diameter	3.8mm (0.15in) (Single annealed copper wire mesh)	5.6mm (0.22in) (Single annealed copper wire mesh)
Applicable connector plug	Connector plug for 3C-2V (BNC-P-3-N1-CAU is recommended.)	Connector plug for 5C-2V (BNC-P-5-N1-CAU is recommended.)

(2) Connector

- GOT connector
  Use BNC connector for GOT side connector.
 The following shows the connection method for BNC connector and coaxial cable.

(a) Construction of BNC connector and coaxial cable.

Parts of the BNC connector	Construction of coaxial cable
Nut, Washer, Gasket, Plug shell, Clamp, Contact	Outer sheath, Outer conductor, Insulating material, Internal conductive material

(b) Connecting the BNC connector with the coaxial cable.

|	
15mm (0.59inch) — Remove the outer sheath.	1) Remove the outer sheath of the coaxial cable in the specified dimension as shown left.
Clamp, Nut, Washer, Gasket	2) Slip a nut, a washer, a gasket, and a clamp through the coaxial cable as shown left, and loosen the outer conductor.
Internal conductive material, Insulating material, 3mm (0.12inch), Clamp and outer conductor, 6mm (0.24inch)	3) Cut off the insulating material and internal conductive material in the specified dimensions as shown left. Cut off the outer conductor in the same dimension as the taper part of the clamp, and extend it over the clamp.
Soldering	4) Solder the contact to the tip of the internal conductive material.
	5) Insert the contact assembly of 4) into the plug shell, and engage the plug shell with the nut.

*1: Soldered part must not have excess solder mound.
*2: The tail end of the contact must come into close contact with the cut end of the insulating material. The contact must not be cutting in the insulating material.
*3: Apply solder quickly so that the insulating material will not be deformed by heat.

- Connector at the video camera and vision sensor
  Use a connector applicable to the video camera or vision sensor to be used.

(3) Precautions for cable preparation

The maximum cable length differs depending on the specifications of the video camera and vision sensor to be used.

For details, refer to manuals for video camera and vision sensor.

When a cable length gets longer, video signals are attenuated, and video images deteriorate.

When using a cable exceeding the length described in the following table, it is recommended to correct video images using a video signal amplifier.

Cable type	Cable length [m] (feet)
3C-2V	100 (328.1)
5C-2V	200 (656.2)

(4) Precautions for laying cable

Consider wiring using double-shielded coaxial cable in places that are subject to large amounts of noise.
The 5C-2V connector plug is applicable to double-shielded coaxial cable.
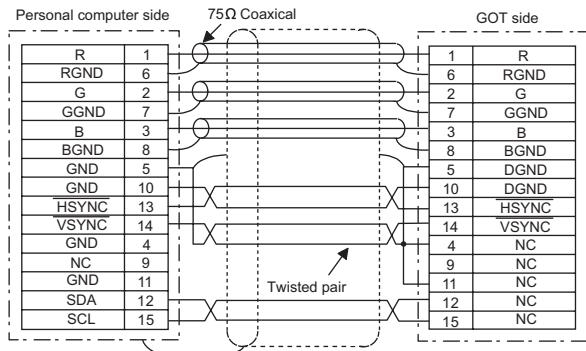

Connect the 5C-2V connector plug to the coaxial cable inside a double-shielded coaxial cable. Ground the shielded part outside a double-shielded coaxial cable as shown in the above figure.

2.4.2 Specifications of the cables (9-core combined cables) used when displaying RGB screens

(1) Cable specifications

Item	Specifications
Applicable cable	Equivalent to SP23-23352A UL20276-SB
Applicable wire size	9-core combined cable (recommended)

(2) Connection diagram

Personal computer side		75Ω Coaxical	GOT side	
R	1		1	R
RGND	6		6	RGND
G	2		2	G
GGND	7		7	GGND
B	3		3	B
BGND	8		8	BGND
GND	5		5	DGND
GND	10		10	DGND
HSYNC	13		13	HSYNC
VSYNC	14		14	VSYNC
GND	4		4	NC
NC	9		9	NC
GND	11	Twisted pair	11	NC
SDA	12		12	NC
SCL	15		15	NC

(3) Connector

• GOT side connector
The following model is used for the GOT connector.
Use a connector that matches the following connector.
15-pin D-sub (male) inch screw type
Manufactured by DDK
17HE-R13150-73MC2

• Connector at the personal computer and vision sensor
Use the connector applicable to the personal computer and vision sensor.

(4) Precaution for cable creating
The length of a cable differs depending on the personal computer and vision sensor to be used.
Male the create within the range of personal computer and vision sensor specifications.

3. Part Names and External Dimensions

## 3.1 Part names and external dimensions of the video input unit

GOT main unit
Dimensions of X when the video input unit is mounted to the GOT.

12.1"	18 (0.71)
10.4"	21 (0.83)

Unit: mm (inch)

No.	Name	Description
1)	Connector for video input	Connector for connecting a coaxial cable
2)	Interface connector	Connector mounted to the GOT
3)	Extension connector	Connector to which a back extension unit is installed
4)	Connector for video/RGB connection	Connector connecting with the video/RGB interface of GOT
5)	Board fixing screw	Screw for fixing the extend interface relay board
6)	Mounting screw	Mounting screws for fixing the unit to the GOT
7)	Rating plate	-

## 3.2 Part names and external dimensions of the RGB input unit

GOT main unit

Dimensions of X when the RGB input unit is mounted to the GOT.

12.1"	18 (0.71)
10.4"	21 (0.83)

Unit: mm (inch)

No.	Name	Description
1)	Connector for RGB input	Connector for connecting 9-core combined cables
2)	Interface connector	Connector mounted to the GOT
3)	Extension connector	Connector to which a back extension unit is installed
4)	Connector for video/ RGB connection	Connector connecting with the video/RGB interface of GOT
5)	Board fixing screw	Screw for fixing the extend interface relay board
6)	Mounting screw	Mounting screws for fixing the unit to the GOT
7)	Rating plate	-

## 3.3 Part names and external dimensions of the video/RGB input unit

Dimensions of X when the video/RGB input unit is mounted to the GOT.

12.1"	18 (0.71)
10.4"	21 (0.83)

Unit: mm (inch)

No.	Name	Description
1)	Connector for video input	Connector for connecting a coaxial cable
2)	Connector for RGB input	Connector for connecting 9-core combined cables
3)	Interface connector	Connector mounted to the GOT
4)	Extension connector	Connector to which a back extension unit is installed
5)	Connector for video/RGB connection	Connector connecting with the video/RGB interface of GOT
6)	Board fixing screw	Screw for fixing the extend interface relay board
7)	Mounting screw	Mounting screws for fixing the unit to the GOT
8)	Rating plate	-

3.4 External dimensions of the extension interface relay board

24 (0.94)

64 (2.52)

27.5 (1.08)
Unit: mm (inch)

4. Installation Procedure

(1) Power off the GOT.

(2) Remove two extension unit covers of the GOT.

(3) Attach the extend interface relay board to the extend I/F-2 side on the GOT.
After the installation, detach the connector cover from the extend interface relay board.

(4) Fit the video/RGB input unit in the GOT case.

Remove the connector cover

(5) Fasten the video/RGB input unit by tightening its mounting screws (4 places) with tightening torgue 0.36 to 0.48 N•m.

(6) Fasten the bus connection unit by tightening the board fixing screws (2 places) with the tightening torque of 0.36 to 0.48 N•m.
(7) When installing an extension unit on the unit that has been installed,
remove the connector cover and the sticker.
When not installing an extension unit on the unit that has been installed,
in order to avoid receiving electrostatic, stick accessory stickers to cover
the top of mounting screws (4 places).
Keep the connector cover fixed.
Keep the sticker stuck as it is.

Connector cover   Accessory sticker

Sticker

Accessory sticker
Point

Remove the screws that fixes the extend interface relay board before
removing the unit.(Above 6))
